

LIFT PHONE MONITORING & COMPLIANCE

Helping Australian buildings meet AS 1735.19 emergency communication requirements.

Australian Standard AS 1735.19 requires passenger lifts to provide reliable emergency communication with a monitored response service.

With copper phone networks being phased out, many existing lift phone systems no longer meet today's compliance requirements.

Portal Technology helps property managers, body corporates and building owners upgrade, monitor and maintain lift phone systems with confidence.

Why Lift Phone Compliance Matters

Many buildings still rely on ageing lift phone systems that may not meet current Australian Standards. Compliance is more than simply having a phone installed.

- 1 Emergency calls must connect to a 24/7 monitored response centre.
- 2 Systems require battery backup to continue operating during power outages.
- 3 Every lift must be individually identifiable so emergency responders know exactly where assistance is required.
- 4 Regular testing and reporting are required to meet compliance obligations.
- 5 With copper phone networks being phased out, many systems require upgrading to modern 4G or VoIP technology.

How Portal Helps

Portal Technology is a Territory-based specialist delivering lift phone monitoring and compliance solutions across Australia.

Our cloud-based monitoring platform gives building owners and property managers complete visibility of every lift phone system while helping maintain compliance with Australian Standard AS 1735.19.

Portal supports you through every stage of your lift phone compliance journey.

ASSESS

Review your existing lift phone system and identify compliance risks.

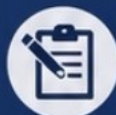

MONITOR

24/7 monitoring with real-time alerts for battery, mains power and communication failures.

REPORT

Automatic event logging and compliance-ready reports whenever you need them.

MAINTAIN

Ongoing management, testing support and system monitoring to keep your lifts compliant.

Why Choose Portal Technology?

- ✓ Australian-based support
- ✓ 24/7 Lift Phone Monitoring
- ✓ Real-Time Fault Alerts
- ✓ Battery & Power Monitoring
- ✓ Automatic Compliance Reporting
- ✓ Multi-Building Management
- ✓ No Hidden Fees
- ✓ Trusted Territory IT Specialists

Know your lift phones are always ready.

Whether you manage one building or an entire property portfolio, Portal Technology provides the monitoring, reporting and support needed to help keep your lift emergency communication systems compliant.

Contact Portal Technology today to discuss your lift phone requirements and receive a tailored solution.
